

*Dakota Grandmother's Open Letter
to Humanity Leadership Rising Summit*

[Additional signatures of grandmothers & grandfathers & all peoples across our
Planet]

Beloved Relatives,

Loving life, mystery, and creation and having lived long enough to gain a long perspective on humanity, our human psyche, and human evolution in 2020, I/we offer this letter for this summit.

“Myths show us again and again that we all should have some early, crucial glimpse of the character of life we ‘could’ have. Whether we actually take that path or not, we catch a glimpse, some radiance briefly reveals itself . . . These glimpses are not *earned* as such, but are part of psychic inheritance that we all share. The greater society’s slumber, the less likely it is that those glimpses are celebrated or raised to the light by those around us. The more disconnected from this mythic inheritance, the more we sense that some great thing will NOT happen; we heard the hooves but never caught the rider’s eye.” Martin Shaw, Snowy Tower, pg. 102

LET US ALLOW SOMETHING GREAT TO HAPPEN!!

Our human psyche is amongst the most fascinating constructs in our universe right along with the mystery of life itself, existence, materiality, black holes, etc. Hopefully, our human psyche will be under close scrutiny at the Humanity Rising Summit. It is about 4~ Four things regarding our human psyche that I/we write this OPEN LETTER along with 4 Four REQUESTS.

1~ Our human psychic range is demonstrated and can be explicitly seen by our full range of human activity. However, much of our human endeavor, activity is NOT ACKNOWLEDGED and lies in mostly forbidden zones mostly 'out of sight' and 'out of mind.'

Discussion: On the more obvious and what one might term 'stellar' side of our lives and "psychic range:" noble laureates; Olympic gold medalists; great artists and wizards of literature, scholarship, music, stage, palette, and architecture; engineers and astronauts of land, sea, and outer space; diplomates, peacemakers, scholars, doctors, lawyers, teachers, entrepreneurs big and small; healers, mystics, clairvoyants, and clergy high and low, etc.

On the darker, underworld side of our "psychic range:"

Drug cartels; human kidnapping and trafficking networks; human slavery; torture in prisons, prisoner of war camps; spies, hackers, assassins, pimps, thieves; parental child abuse ranging from incest to starvation, beatings, and torture; a child welfare system riddled with child abuse, and darker into satanic cults and various rings of blood rituals and child and baby torture. Pornography uses 15-20% of the internet. Millions upon millions of orphans, homeless, and impoverished are accepted as commonplace!

It is important to note that people of all ages, social status, and culture often practice in both spheres. Shamans still molest in sweat lodge and ayahuasca ceremonies just as clergy molest children and some people feel the need to drink tortured babies' blood. This whole social 'underworld' is a crucial part of our global economic and social engine.

2~ Our current multi-generational, multi-millennial social structure, values, and leadership structure continues to keep most of humankind in great ignorance, poverty, slavery, and servitude. In others words, our most powerful nations

have no genuine 'leaders,' correcting or addressing the needs of the masses. We have mostly demigods, potentates, dictators, and immature relic holders of outmoded roles.

Discussion: There is no G8 political leader, nor South American, nor African leader, nor Polynesian, nor Asian, nor Chinese, nor Central American leader who is willing to put every orphan into a good home; organize to stop poisoning the land, the water, and the people and get every planetary citizen, every river, every fish, every forest, and every frog healthy; organize to end child abuse, domestic violence, racism, war, genocide and begin a process to heal; to care for one another; to learn and spread compassion.

3~ The majority of humanity is in GREAT SUFFERING! And we humans, our species, our collective; WE are causing our own suffering. And now, our suffering is being exacerbated by an illness preying upon us all; and preying most deadly to our children, our weakest, and most impoverished and needy.

Discussion: Our leaders and almost all of humanity continues to lie; allow war; allow trauma; allow hatred, bitterness and fear to remain and grow; allow starvation; allow homeless to scrounge existence on our city streets; allow poverty; allow continued genocide of indigenous peoples and most grievously, we all allow child abuse to continue in almost ALL of our homes. Child abuse is endemic in many lands. Every time we yell shame and belittle and overlord a child, we perpetuate our hell on earth. Every time we negatively judge another or ourselves; we send a spear into a heart! We are hurting ourselves!

This is The Great Turning! Turn to face ourselves: in our abominations throughout time. This is a great humbling needed now. All our transgressions are 'coming out of the closet' now so, we can take responsibility. We have the ability to respond only as we embrace our acts, ourselves, and one another. As we care for our lives and one another; grief, great grief; the ocean of salty tears washing our planet can begin kneading open our cold hearts; only then can forgiveness begin to flourish; tears of reconciliation can flow; inspiration to walk hand in hand can grow; we open the doorway into a new humanity for ourselves and future generations. Heart love just naturally radiates the truth of who we really are!

4~ Every member of humanity shares collective unconscious trauma in our family histories, bones, blood, and DNA from thousands of years of war, genocide, holocaust, privation, slavery, servitude, and fear. This trauma blunts and/or closes our hearts leading to our great denial and heinous acts we mostly do not face.

Discussion: There is fast growing recognition of humanity's collective millennial human trauma. "The collective unconscious contains the whole spiritual heritage of mankind's evolution, born anew in the brain structure of every individual."(Carl Jung) You, me, your best friend, your teachers, the president of Bolivia, the premier of China, your pen-pal in Peru; we all carry the legacy of our species' triumph's and our wounds. We are all grievously wounded, suffer a sickness of our Soul and are in a state of great denial together. Chief Phil Lane keeps repeating everywhere he goes: "The hurt of one is the hurt of all."

These words, this precis is purposefully stark, extreme, and meant for impact! I/we pray this is impacting you. Of course, we are glorious loving beings in our mythic, cosmic, and deepest nature. Our nature is multi-dimensional in essence and consciousness, thus we can and do span time and space. BUT, we are not yet there!

REQUESTS

1. Humility and intimacy. Drop your role, drop your habitual way of being and talking with everyone. Let your shields, defenses down. Fall in love with others perhaps before you fall into love with yourself and maybe visa-versa. Allow your heart to open, your emotional realm to come alive, thrive, and heal. LISTEN. Fall ~ no Open, become love.
2. Join into a deeper extended community. Allow beauty, promote beauty, find ways to bring beauty into EVERYTHING you do, say, plan, create and discover how this allows mythos to enter, inspiration and the muses to come. Music, dance, singing, moaning, swooning to let your body become your guide as each relationship, each friendship; each acquaintance flourishes in the magic of life. Let us begin to be The Human Family.

3. Go Deep into everything we have done, most especially the harm to the babies. The babies hacked out of wombs, bludgeoned in war, beaten by parents in their homes into senselessness, battered into numbness, broken bones. Babies killed in blood sacrifices in all the horrific rituals throughout the millennia. Let us not be shy about our abomination throughout history for those babies are waiting still; caught in-between. Yes, grieve, weep, mourn. And grieve again. This is a collective harm we have done. The baby/child in you is waiting. All the babies are waiting. In essence, we are beyond all abomination, but our unclaimed evil bars the door. No ONE person can do this alone; this is our collective millennial work to do. Let us move together toward freedom.
4. Invite the Sacred, the Holy, Deep Mystery, Creator. Entreat our love to grow. We are in fact all equal and corona is revealing this is so. Let us meet in many circles, many gatherings of love to overcome our fear and despair; ceremonies far and wide. Let us bring ourselves together! Together, we can plan and shape our future as the crumbling of our history falls into our hands, heads, and hearts. We must learn to work and lead together as we each contribute from wisdom, knowledge and inspirations all flowing in service to our families, loved ones, communities in peace and in harmony with Earth. Let us come out of denial, so we can transmute our killing, barbarism, and hell. Deeply together, let us all grow in compassion, gaining wisdom and becoming love.

Let us go more consciously forward in our long multi-millennial evolution: that we can use this special liminal time in great transformation; that with greater love comes healing; that leadership now needs to change; that we are all sacred; and that we need to treasure our planetary home.

I/We would invite various forums and dialogues of this gathering to speak with us of these things. I/We would invite ceremony into this gathering. I/We would encourage this gathering to invite concurrent and on-going talking circles across the world to also be gathering to speak of these things. In this way we can inspire and conspire together as the mystery of love and compassion guide our way.

The great vision of Black Elk foretells of the many circles, circles embracing circles; the mending of the great hoop. Let us all come together and mend all the broken hoops of the world.

Mystery, Great Mystery, we bow: Beloved
